ELSEVIER

Comput. Methods Appl. Mech. Engrg. 135 (1996) 405–406

Computer methods in applied mechanics and engineering

Contents Volume 135

Volume 135, Nos. 1–2, 15 August 1996

Observation and simulation of a large signal mechanical vibrating system
N.N. Barsoum and G.A. Elkobrosy 1

An efficient tire model for the analysis of spindle forces produced by a tire impacting large obstacles
C.W. Mousseau and G.M. Hulbert 15

Bubble-stabilized spectral methods for the incompressible Navier–Stokes equations
C. Canuto and V. Van Kemenade 35

Automated synthesis of surface generation equations with application to gearing
V.T. Portman 63

Numerical integration of multibody system dynamic equations using the coordinate partitioning method in an implicit Newmark scheme
P. Fisette and B. Vaneghem 85

Finite element implementation of incompressible, transversely isotropic hyperelasticity
J.A. Weiss, B.N. Maker and S. Govindjee 107

A Tri–Tree multigrid recoarsement algorithm for the finite element formulation of the Navier–Stokes equations
S.Ø. Wille 129

Element-free Galerkin methods in combination with finite element approaches
D. Hegen 143

A new computer method for temperature measurement based on an optimal control problem
N. Damean, Z. Houkes and P.P.L. Regtien 167

Compound branching in elastic systems
K.A. Lazopoulos and S. Markatis 187

Volume 135, Nos. 3–4, 1 September 1996

A note on enhanced strain methods for large deformations
P. Wriggers and S. Reese 201

Non-linear 'master–slave' relationships for joints in 3-D beams with large rotations
G. Jelenić and M.A. Crisfield 211

Numerical studies of unsteady boundary layer flows past an impulsively started circular cylinder by GDQ and GIQ approaches
C. Shu, B.C. Khoo, Y.T. Chew and K.S. Yeo 229

Explicit finite-difference methods for non-linear dynamic systems: Froude's pendulum
K. Djidjeli, Z. Guan, W.G. Price and E.H. Twizell 243

The post-critical analysis of axisymmetric hyper-elastic membranes by the finite element method
J. Shi and G.F. Moita 265

Development of elasto-plastic material models in a natural coordinate system
P. Duxbury and X. Li 283

Composite grid method for hybrid systems
J. Fish, V. Belsky and M. Pandheeradi 307

A new boundary spectral strip method for non-periodical geometrical entities based on analytical integrations
O. Michael, J. Avrashi and G. Rosenhouse 327

Three-dimensional mixed explicit–implicit generalized Galerkin spectral element methods for high-speed turbulent compressible flows
K.T. Yoon and T.J. Chung 343

A multicriterial material tailoring of a hollow cylinder in functionally gradient materials: Scheme to global reduction of thermoelastic stresses
K. Tanaka, H. Watanabe, Y. Sugano and V.F. Poterasu 369

A parallel structural optimization method and its implementation on a Transtech Paramid
X. Wang, F.W. Williams and D. Kennedy 381
